ABOUT ME

Hello, my name is Sarah Nurbilqis Aulia, and I am a Software Engineering student at SMK TARUNA BHAKTI who is interested in web development, app development, and UI/UX design. I have worked on several website and app projects using technologies such as JavaScript, Next.js, Express.js, MySQL, and React Native. Furthermore, I enjoy learning new things, improving my skills, and working both independently and in teams to create useful and user-friendly digital solutions.

PROJECT EXPERIENCE

Library Management System

- Developed a responsive web-based library management system for managing books and member activities.
- Create a secure authentication system for library staff and members.
- Implemented CRUD functionality for book, category, and member data management.
- Built borrowing and book return features with automatic loan status updates.
- Designed a dashboard to monitor book availability, borrowing history, and member information.

Public Complaint Management System

- Developed a responsive web and mobile application for submitting and managing public complaints.
- Implemented secure role-based authentication and authorization for Public Users, Admins, and Super Admins.
- Built complaint management features, including status tracking, image uploads, notifications, and user-admin communication.
- Added report export functionality in PDF and Excel formats for documentation and administrative purposes.

CERTIFICATION

Sertifikat Uji Level | Taruna Bhakti 2025

- Simple E-Commerce Web Application
— Score: 81 | Competent

Sertifikat Uji Level | Taruna Bhakti 2026

- Simple Complaint Management Web Application
— Score: 90 | Competent

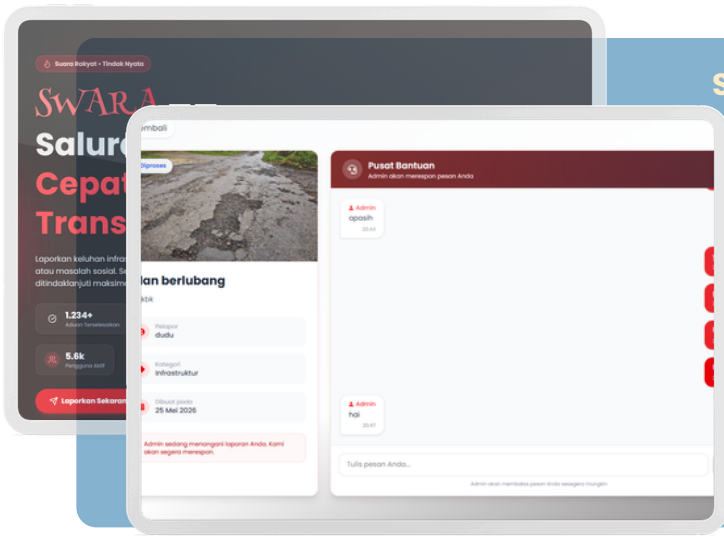

SKILLS

- NodeJs
- NextJs
- ReactNative

- MySQL
- Supabase
- Figma

- ExpressJs
- PHP
- **Comunication**
- **Team Work**

PROJECT

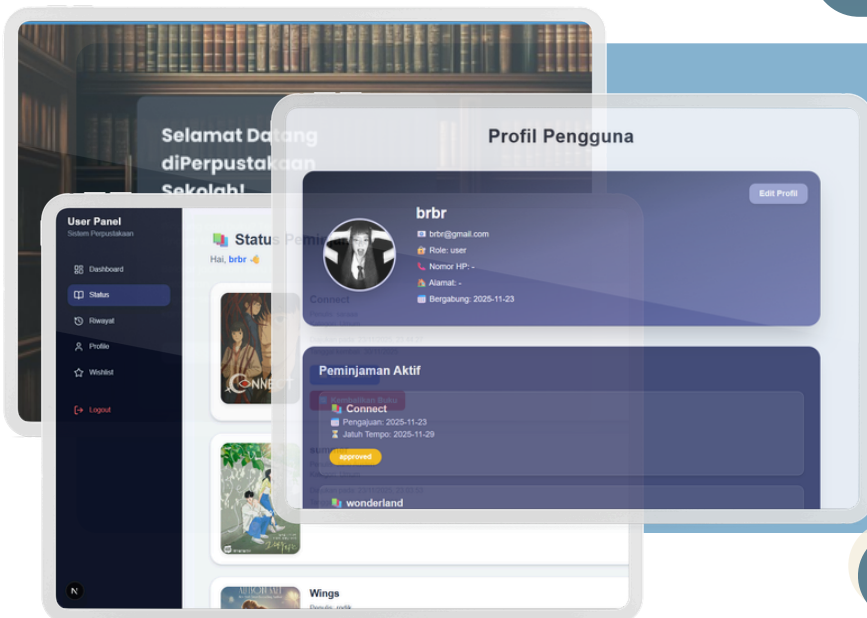

SWARA | Public Complaint Management | 2026

SWARA is a web-based public complaint reporting system developed to simplify the complaint submission process. The platform serves as a communication bridge between citizens and administrators, enabling complaints to be managed in a more structured, transparent, and efficient manner.

Tech Stack: NextJS, Tailwind, NextAuth, MySQL.
